

# DESCHAMPS BIO SAND FENCING

**DESCHAMPS' BIO Sand Fencing is an innovative 100% biodegradable and compostable Multilayer Textile Sand Fence.**

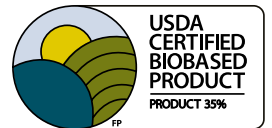

## DESCHAMPS MATS SYSTEMS INC. VISION

With 150 years of experience in Technical Textiles, our vision is to leave a cleaner world for future generation and offer our customers added value through sustainable biodegradable textile solutions for beach renourishment and dune reinforcement.

## INNOVATIVE / PATENT PENDING GREEN TECHNOLOGY

DESCHAMPS BIO SAND FENCING is made from a patent pending 100% Biodegradable monofilament, certified by the USDA as a combination of 100% biodegradable copolyester with bio-additives and natural renewable resources.

## SEAMLESS EFFICIENT FILTER

The DESCAMPS BIO SAND FENCING blocks 100% of the sand due to its innovative seamless cloth.

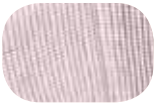

## NATURAL SOIL DECOMPOSING

DESCHAMPS BIO SAND FENCING is certified by BPI as a fully compostable material in less than 6 months in industrial facilities and within three years in its natural environment with no impact on the shoreline system.

## STANDARD & CUSTOMIZED LENGTHS

BIO SAND FENCING	Material	Color	Pocket Ø	Dimensions			Ref.
				Height	Length	Weight	
0,07 lb/sqft 340 g/m <sup>2</sup> 	BIO MOFI C3 100% biodegradable 	NUDE	4" (100mm)	3.25' (1m)	10' (3m)	2.2 lb (1 kg)	<b>220 455</b>
					20' (10m)	7.5 lb (3.4 kg)	<b>220 456</b>
					50' (15.2m)	11.4 lb 5.2 kg)	<b>220 457</b>
					100' (30.4m)	22.7 lb (10.3 kg)	<b>220 458</b>
				6.5' (2m)	10' (3m)	4.4 lb (2 kg)	<b>220 459</b>
					20' (10m)	15 lb (6.8 kg)	<b>220 460</b>
					50' (15.2m)	22.9 lb (10.4 kg)	<b>220 461</b>
					100' (30.4m)	45.4 lb (20.6 kg)	<b>220462</b>

## EASY AND QUICK INSTALLATION

There are pockets included in the fabric for sliding the posts and installing the BIO SAND FENCING along the base of an eroded dune or perpendicular to trap windblown sand and help rebuild the dune.

Time for setting lies in time for digging in the posts.

After two years of installation, once the dune is built, DESCHAMPS BIO SAND FENCING will slowly start decomposing, with a progressive decrease of its original properties.
